## Personal profile

My name is Brian Pulfer and I was born on 21.09.1995 in my hometown Lugano in Switzerland. I am passionate for coding and computer science in general, with particular interest for artificial intelligence and algorithms in general.

## Education

- **2016 – 2019** | SUPSI - Bachelor of Science SUPSI in Computer Science:  
During my studies at SUPSI I learned a lot on both Maths and Informatics subjects. SUPSI offered me the opportunity to develop big experience with many practical lectures and projects. To learn more about what i studied, please find attached my grades. You can also take a look at my practical projects by visiting my own website and my github account.
- **2010 – 2014** | CPC Lugano – AFC & MPC :  
During my studies at the Professional Business School of Lugano (CPC) I learned the job of a business employee and graduated first with the *Attestato federale di Capacità* (AFC) in 2013 and then with the *Maturità Professionale Commerciale* (MPC) in 2014.

## Skills

Apart from a great knowledge of object-oriented programming and other software engineering concepts, I also know a discrete amount of Languages, such as English, Italian, French, Spanish and German.

## Experiences

- **June 2016 – August 2016** | Business Employee by KazMunayGas Trading AG  
As employee, I had the duty of handling different archive related tasks using software such as Microsoft Excel 2013.
- **March 2015 – January 2016** | Army service (Soldier)  
During this period I served the Swiss Army as a soldier for 10 months. By doing so, I terminated all my obligations related with the swiss army.
